## TECHNOLOGIES AND LANGUAGES

- Angular • React • Next.js • Redux • TypeScript • RxJS • Nest.js • Node.js • Postgres • Jest • Playwright
- Docker • GitHub • GitLab • Figma • Sass/SCSS • Vercel • GraphQL • REST APIs • CI/CD

## WORK EXPERIENCE

NQODE - Novi Sad, Serbia	Apr 2024 - Present
--------------------------	--------------------

### Front-end Developer

Brightfunded.com

Utilized: Angular, RxJS, Typescript, Docker, Figma

- Built a modular and scalable front-end architecture using **Angular** and **TypeScript**, enabling future expansion and code maintainability
- Designed a reusable component library, accelerating development and ensuring UI consistency
- Introduced linting tools, coding standards, and peer code reviews to streamline onboarding and promote a collaborative team culture

### Full-Stack Developer

SOURCE.AG

Utilized: Next.js, Typescript, Nest.js, Jest, Playwright, GraphQL

- Built a high-performance, server-rendered web application using **Next.js** and **NestJS**
- Integrated both **GraphQL** and **REST APIs** for efficient data handling and dynamic interfaces
- Deployed via **Vercel** using CI/CD pipelines and serverless functions for fast iteration and scaling

EPAM SYSTEMS - Novi Sad, Serbia	Feb 2022 - Apr 2024
---------------------------------	---------------------

### Front-end Developer

Meridianbet - Global Sports Betting and Casino

Utilized: Angular, Typescript, React, SASS, Nest.js, Docker

- Created interactive and responsive UI features using **Angular** and **React**
- Used Docker to streamline environment setup and ensure consistency across deployments
- Helped align technical implementation with design and functional goals in cross-functional teams

CODEPLICITY - Novi Sad, Serbia	Feb 2021 - Feb 2022
--------------------------------	---------------------

### Front-end Developer

Various Internal Projects and Infrastructure

Utilized: JavaScript, SASS, Vagrant, PHP

- Developed clean and efficient UI components using vanilla **JavaScript** and modular **Sass**
- Maintained legacy codebases and introduced modern solutions where needed
- Set up reproducible local environments using **Vagrant**, reducing time spent onboarding new developers

## PERSONAL PROJECTS

### Dr Bean Coffee

<https://www.drbean.org/>

Utilized: React, Motion, Illustrator, Figma, Vercel

- Created full branding including logo, packaging, and website visuals using **Figma**, **Illustrator**, and **Photoshop**.
- Developed a responsive **React** website with **Framer Motion** animations and deployed on **Vercel**.
- Optimized for performance, SEO, and cross-device compatibility to deliver a seamless user experience.

### Pelemiš Dental Care

<https://www.drpelemis.rs>

Utilized: React, Motion, Figma

- Designed and developed a responsive **React** SPA with smooth animations using **Framer Motion**.
- Optimized for fast load times, SEO, and seamless user experience across devices.
- Deployed to a remote server, ensuring stable production performance and cross-browser compatibility.

### Advokatska Kancelarija

<https://advokatunovomsadu.rs>

Utilized: React, Motion, Contentful, Figma

- Designed and developed a responsive **React** SPA with smooth **Framer Motion** animations, integrated with **Contentful CMS** for dynamic content management.
- Deployed on a remote server, ensuring fast load times, security, and cross-device compatibility.
- Applied SEO best practices and performance optimizations to boost search engine visibility and user experience.
