TECHNICAL SKILLS

- Angular • React • Next.js • Redux • TypeScript • RxJS • Nest.js • Node.js • Postgres • Jest • Playwright
- Docker • GitHub • GitLab • Figma • Sass/SCSS • Vercel • GraphQL • REST APIs • CI/CD

WORK EXPERIENCE

NQODE - Novi Sad, Serbia

Apr 2024 - Jun 2026

Front-end Developer
Brightfunded

Utilized: Angular, RxJS, TypeScript, Playwright, Figma

- Shaped a modular front-end architecture in Angular and TypeScript, supporting long-term maintainability and future feature expansion.
- Designed a reusable component library of around 35 components that accelerated UI development and kept the interface visually coherent.
- Introduced end-to-end testing, reaching 60%+ coverage across critical flows.
- Established linting standards, code review processes, and onboarding documentation, raising code quality and shortening ramp-up for new developers.

Front-end Developer
Owow

Utilized: Next.js, Payload CMS, Tailwind, Figma

- Built and maintained a performant Next.js front-end integrated with Payload CMS for dynamic content management.
- Implemented responsive, pixel-perfect UIs using Tailwind CSS based on Figma designs.
- Collaborated closely with designers to ensure high visual fidelity and consistent component structure across the platform.

Full-stack Developer
SOURCE.AG

Utilized: Next.js, TypeScript, Nest.js, Jest, Playwright, GraphQL

- Architected a server-rendered application with Next.js (SSR) and Nest.js, moving rendering server-side to improve first-load performance and crawlability.
- Implemented technical SEO, meta tags, structured data, and server-rendered markup to make content indexable by search engines.
- Integrated GraphQL and REST APIs to support efficient data fetching and dynamic interfaces.
- Automated deployments through Vercel CI/CD, shipping serverless functions on every merge to main.
- Covered critical user journeys with Playwright E2E tests and unit tests with Jest.

EPAM SYSTEMS - Novi Sad, Serbia

Feb 2022 - Apr 2024

Front-end Developer
Meridianbet - Global Sports Betting and Casino

Utilized: Angular, TypeScript, React, SASS, Nest.js, Docker

- Developed interactive UI features, three casino games, and internal admin platforms for a sports betting product serving 50+ markets using Angular for the core application, React for smaller standalone apps.
- Containerized development environments with Docker, keeping local and production deployments in sync.
- Partnered with designers, backend engineers, and product owners across a 25-person team to translate design specs and business requirements into shipped features.

CODEPLICITY - Novi Sad, Serbia

Feb 2021 - Feb 2022

Front-end Developer
Various Internal Projects and Infrastructure

Utilized: JavaScript, SASS, Vagrant, PHP

- Developed clean, efficient UI components using vanilla JavaScript and modular SASS architecture.
- Maintained and modernized legacy codebases, reducing technical debt and improving performance.
- Configured reproducible local development environments using Vagrant, reducing onboarding time for new developers.
