TECHNICAL SKILLS

- Angular • React • Next.js • Redux • TypeScript • RxJS • Nest.js • Node.js • Postgres • Jest • Playwright
- Docker • GitHub • GitLab • Figma • Sass/SCSS • Vercel • GraphQL • REST APIs • CI/CD

WORK EXPERIENCE

NQODE - Novi Sad, Serbia Apr 2024 - June 2025

Front-end Developer
Brightfunded

Utilized: Angular, RxJS, Typescript, Docker, Figma

- Built a modular and scalable front-end architecture using Angular and TypeScript, enabling long-term maintainability and future feature expansion.
- Designed a reusable component library that accelerated UI development and ensured visual consistency across the application.
- Introduced linting standards, code review processes, and onboarding documentation to improve team efficiency and code quality.

Front-end Developer
Owow

Utilized: Next.js, Payload CMS, Tailwind, Figma

- Built and maintained a performant Next.js front-end integrated with Payload CMS for dynamic content management.
- Implemented responsive, pixel-perfect UIs using Tailwind CSS based on Figma designs.
- Collaborated closely with designers to ensure high visual fidelity and consistent component structure across the platform.

Full-Stack Developer
SOURCE.AG

Utilized: Next.js, Typescript, Nest.js, Jest, Playwright, GraphQL

- Built a high-performance, server-rendered web application using Next.js (SSR) and NestJS, improving page load times and SEO.
- Integrated GraphQL and REST APIs to support efficient data fetching and dynamic user interfaces.
- Deployed via Vercel using CI/CD pipelines and serverless functions, enabling continuous delivery and auto-scaling.
- Implemented end-to-end tests with Playwright and unit tests with Jest to ensure application reliability.

EPAM SYSTEMS - Novi Sad, Serbia Feb 2022 - Apr 2024

Front-end Developer
Meridianbet - Global Sports Betting and Casino

Utilized: Angular, Typescript, React, SASS, Nest.js, Docker

- Developed responsive, interactive UI features for a global sports betting platform using Angular and React.
- Containerised development environments using Docker, ensuring consistency across local and production deployments.
- Collaborated in cross-functional teams to align technical implementation with design specifications and business requirements.

CODEPLICITY - Novi Sad, Serbia Feb 2021 - Feb 2022

Front-end Developer
Various Internal Projects and Infastructure

Utilized: JavaScript, SASS, Vagrant, PHP

- Developed clean, efficient UI components using vanilla JavaScript and modular SASS architecture.
- Maintained and modernised legacy codebases, reducing technical debt and improving performance.
- Configured reproducible local development environments using Vagrant, reducing onboarding time for new developers.
